

How to calibrate SBMJ REELS

1-Press **RESET & MODE** buttons simultaneously till you hear a **bip** (around 10 seconds)

2- Moving the JOG POWER LEVER find **Calculation Value**

3- By pressing the **MEMO(=ok)** you will be able to adjust the line length with the help of the **JOG POWER LEVER**

4- Once the line numbers are adjusted Press **MEMO** button (few times) till it takes you to the initial screen
